# REGIONS BEYOND®

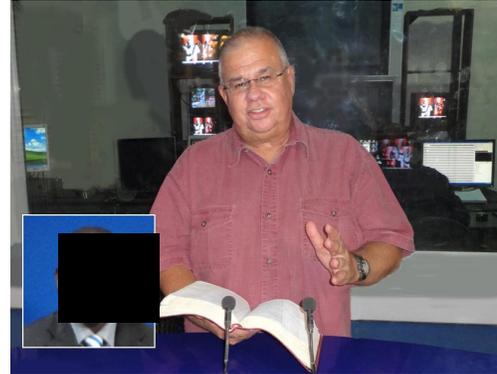

**Bruce & Becky McDonald**

March 2012

Dear Friends in Christ,

Thank you for your prayers about our recent outdoor crusade and church plant in the North African Islamic country of ----- . Despite the spread of radical Islam in the region, hundreds of people ran to the altar every night as Jesus was proclaimed.

----- is located in the Sahara Desert region of Africa and daily temperatures exceeded 105° F. The outdoor crusade meetings were held at night and it was around 3:00 AM when I went to bed each night.

Bruce McDonald live on Islamic TV

A new building was constructed by our new, local pastor in anticipation of filling it with converts. The response was more than anticipated and the building can not contain all of the new believers who have committed themselves to the church.

Each week we have a live, primetime broadcast on an Islamic controlled television station. The program holds nothing back in relation to the gospel, which is preached clearly and concisely. The program now reaches into the homes of millions of Muslims every week. I have been asked to personally conduct half of the weekly programs that are broadcast to the nation. Since I can not be there for each live program, I return in a few weeks for recordings with the station.

I will write more about the North Africa ministry in a future newsletter. but I wanted to give you a brief report this month since I am not able to prepare a full newsletter due to the short time between the North Africa ministry our next major ministry event. Later this week I leave for a pastors conference followed by outdoor evangelism in southern Ethiopia. Your prayers are appreciated for the ministry, safety in travel and a financial miracle.

Muslims respond to the gospel

If you have an opportunity, please visit our channel on YouTube where you will see a short video of me that was recorded in a remote tribal village during February. The video summarizes our ministry and can be seen at [www.youtube.com/RegionsBeyond](http://www.youtube.com/RegionsBeyond)
